Fort Lauderdale, FL 33312

Subj: ACR MODEL RLB-41 EPIRB

Dear Mr. Stankovic:

We have reviewed the information submitted in your email dated October 30, 2019, requesting USCG acceptance of the ACR Model RLB-41 in accordance with 46 CFR 161.011 as an emergency position indicating radio beacon (EPIRB). Based on the information provided, including the TUV SUD test reports for model RLB-41 Document 75947040-01, Issue 01, dated July 15, 2015, and Document 75947040-03, Issue 02, dated November 6, 2015, indicating compliance with 47 CFR 80.1061(c)(2), we conclude that the subject devices meet the relevant requirements of the RTCM Standard 11000.3(2012).

In compliance with Federal Communications Commission (FCC) requirements, our review verifies performance as a radio beacon for marine use to the applicable Radio Technical Commission for Maritime Services (RTCM) standards. Therefore, USCG approval certificates are not issued for marine radio beacons.

This letter was delivered electronically to dan.stankovic@acrartex.com. No hard copies will be provided. You are welcome to print as many copies as you wish. If you have any follow-up questions, please contact Mr. Marty Jackson at +1-202-372-1391 or typeapproval@uscg.mil. Please reference ID#: 2019-0636 in any correspondence related to this project.

Sincerely,

B. A. BALDWIN
Chief, Lifesaving and Fire Safety Division
U.S. Coast Guard
